

NORDIC PLATFORM PRESENTS: THE NEW SPACEFILLER!

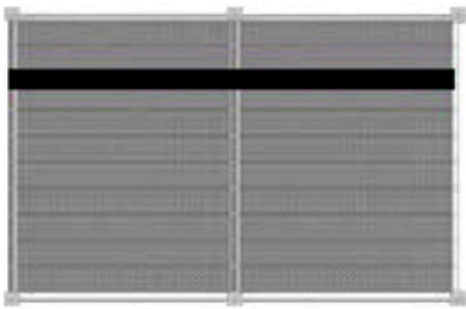

The new scaffold spacefiller is specially designed to close the gap that occurs between the scaffolding platforms. Nordic Platforms new spacefiller has an incredibly low weight ([only 1 kg per meter](#)) and is simple to install! The product is easily customized by cutting it into the needed lengths. The spacefiller can be manufactured in PP material or Ocean plastic. Ocean plastic colors: green and black. PP colors: gray as standard, but can be ordered in other colors.

The new spacefiller is, besides being the lightest on the market, also incredibly strong, inexpensive and can be produced in all colors (only PP-material) and lengths.

LIGHTEST SPACEFILLER ON THE MARKET!

The spacefiller close the gap that occurs on scaffolding between the platforms.

The spacefiller is IPS-protected according to EN PCT.
